Adjustment of lamp current

Adjustment by rotary switch on top of the ballast $y = \frac{9}{7} + \frac{9}{6} + \frac{1}{5} + \frac{2}{3}$	 Pos. 04: internal start (local start) – ballast starts automatically after mains turn on Pos. 59: external start (remote start) – ballast starts by external start signal at the start input No warranty for damages caused by incompatible lamps or wrong adjustments!
Lamp typ	On request
Adjustment of lamp current parameters	Must be carried out before voltage application,
	switching during operation will not be detected
